

A message from our physician founders on the frontlines of the COVID-19 pandemic:

Dear FallCall community members-

As the physician founders of FallCall Solutions who are currently serving our patients afflicted by coronavirus on the emergency and intensive care wards, we are all too familiar with the concerns, anxieties and sadness associated with the current COVID-19 pandemic. In addition to the medical impact, the societal and economic affects have yet to be fully appreciated.

Given these extraordinary times, we want to provide you with some clear reassurance:

FallCall Solutions is running strong and will be there whenever you, your family and/or friends need us!

Operationally, we are continuing to support our growing user base through improved efficiencies at the level of our servers and our 24/7 call center. Thanks to our outstanding development team, we released FallCall Lite v2.5: an update to the Apple Watch/iPhone version that makes sign-up and setup easier for users. In the near future, ElderCheck Now will be updated with new features and some exciting new capabilities planned for 2020. Finally, we are hard at work to bring our subscription monitoring service to Android. As always, both FallCall and ElderCheck Now will remain FREE to download and set up for use with care group members.

We want to be able to provide "peace of mind" for as many people as we can during this unprecedented time.

In closing, we hope that everyone makes it through this period as healthy as possible and we thank you all for your trust in FallCall Solutions. We always appreciate hearing about your experiences/feedback. Given that you can download and setup our app immediately (and not wait for the shipping of third-party devices), be sure to tell a friend about us. We'll be there for them and their families as well.

Sincerely,

Shea C. Gregg, MD FACS
